

Chester DRB

Subject: Julian Quarry Request for Conditional Use Permit

Families have lived here for Generations in the Gassetts area, Never having issues until the Julians bought the Quarry. Never ever having any issues with the former owners. They as in the Julian Brothers have turned our small community into a war zone. Hydrolic Hammering, Blasting, Rocks landing on the Train Tracks Belows, Rocks flying across the Williams River and Landing on a very Busy Highway ( Route 103), also Rocks hitting a power pole and causing a fire. Blasting near a Propane Company, How is that safe at all? Nobody is being notified, not even the railroad, vtrans, Police for the fire department. Nobody is directing traffic. They should be refused on a Conditional Use Permit on Safety Issues Alone. They're just going to wait until somebody gets hurt or even killed before they even do anything at all.

Town Act 250 refused Mike O'Neill on a Quarry that would have benefited us with Cheaper Sand and Gravel, But was refused, UNREAL!

Julian Quarry/ Brothers don't care about anybody in this community, all they care about is the money.

16 felony Accounts in Connecticut. WOW! That's Really Great for our town. NOT!

There is no Quality of life in the Gassetts Area!
